SATQUERY SPATIAL REASONING

Ask Earth Anything.

Upload remote-sensing observations and ask a natural-language question. SatQuery selects the right specialist, grounds the evidence, and keeps its reasoning traceable.

🗣️ SatQuery Agent Ready

SATQUERY

What would you like to understand?

Start with a question, then attach the observation SatQuery should examine. A second image automatically opens cross-modal or change analysis.

Detection reason

A one-band PNG/JPEG is a grayscale display representation; its scientific modality is not encoded. The filename suggests SAR, but that hint is not authoritative.

A one-band PNG/JPEG is a grayscale display representation; its scientific modality is not encoded. The filename suggests SAR, but that hint is not authoritative.

This single-band display cannot be verified automatically. Confirm whether it is SAR, optical grayscale, panchromatic, or another representation.

Confirm the modality before analysis. No specialist will execute while this grayscale display remains ambiguous.
